TEXTILE WORLD

INDEX TO VOLUME 111
January–December, 1961

McGraw-Hill Publishing Co., Inc.
330 West 42nd Street, New York 36, New York

A

Air conditioning and related equipment
Electric power in textiles: 1961 – report ..... Jan. 32
Firth Carpet's Laurens, S.C. plant – managing for better handling and better production ..... Mar. 58
Getting more from maintenance ..... Apr. 69
Grantville story Pt 4 The best in plant services ..... Aug. 63
Heaters cure lint problem ..... June 112
Mayfair Mills air conditioning improves quality, efficiency ..... Apr. 75
Moisture screen ups production 1% ..... Aug. 108
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. ..... June 60
Small towel mill boosts production with new machinery ..... May 61
South African electrostatic filter ..... Feb. 51
Weaveroom relocated down in the basement ..... Apr. 78
What you should know about air conditioning ..... Nov. 58

Alabama Textile Operating Executives
Fall meeting keynotes metallic card clothing ..... Dec. 70
Nep reduction and spinning-frame maintenance highlight meeting ..... Feb. 66
Spring meeting topics – faster weaving; new kind of executive ..... July 55

American Association for Textile Technology
First Annual Conference – Candid talk – and needed, too (Ed) ..... Mar. 39

American Association of Textile Chemists & Colorists (AATCC)
40th annual convention ..... Nov. 76

B

Bast fibers
Dutch replace flax retting with chemicals ..... Aug. 101
East Germans have novel bast spinning frame ..... Nov. 37

Braiding
Spring improvement lessens broken filaments ..... Jan. 104

Building construction and maintenance
Automatic doors ease shipping ..... May 116
Concrete pouring method cuts building costs ..... Mar. 123
Firth Carpet Co.
Burnsville, N.C. mill – material handling goes automatic ..... Feb. 52
Laurens, S.C. plant – managing for better handling and better production ..... Mar. 58
Grantville story Pt 4 The best in plant services ..... Aug. 63
Heaters cure lint problem ..... June 112
New maintenance materials ..... Nov. 129
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. ..... June 60
Shuttleless looms ..... July 30
Tufted-carpet mill – building and starting a new mill ..... Apr. 82
Waste heat from dyehouse heats storeroom ..... June 114
Weaveroom relocated down in the basement ..... Apr. 78

Bulk yarns
Agilon edge-crimped yarn – latest word in texturing ..... Jan. 54
Stretch and bulk for your cotton products – Chemical Finishing Conference paper ..... Dec. 96
Textured yarns machine ..... June 136
Turbo can ..... Sept. 144
Winder ..... June 142

C

Carpets
Acrylic and modacrylic blend in tufted, cut-pile rug ..... May 123
Building and starting a new tufted-carpet mill ..... Apr. 82
Carpet mill expansion – good way to spend $1½-million ..... Jan. 98
Carter Bros., Inc. – imagineering a brand-new company image ..... Sept. 48
Figure tufted carpet weight fast with these nomographs ..... Mar. 56
Finishing operation cuts drying time ..... Mar. 66
Firth Carpet Co.
Burnsville, N.C. mill – material handling goes automatic ..... Feb. 52
Laurens, S.C. plant – managing for better handling and better production ..... Mar. 58
Germans use electrostatic flocking ..... Aug. 101
Knitted carpet scrim ..... Jan. 113
Lofted-nylon filament ..... July 87
New carpets ..... Feb. 123
Nylon, two tone ..... Dec. 133
Nylon axminster ..... July 87
Polypropylene fiber for carpets ..... Oct. 141
Samples cut twice as fast ..... Feb. 120
Shearing carpets crosswise ..... May 135
Textured modacrylic carpet fiber ..... Aug. 111
Tiling with carpet ..... Nov. 141
Tufted in nylon ..... May 124

Chemical treatment and finishing
Benzophenone derivatives cut light damage on nylons ..... Sept. 75
Canvas lasts longer with right kind of protection ..... Aug. 94
Carpet mill expansion – good way to spend $1½-million ..... Jan. 98
Crosslinking binders improve pigment prints ..... June 74
Czechs use isotope to measure pad uniformity ..... Aug. 101
Dye application to polypropylene ..... June 75
Ethylose, modified cellulose, has finish applications ..... June 74
Flameproof, nondrip coating for man-made-fiber fabric ..... Sept. 76
Fluorescent whitening agent ..... Jan. 70
French finishing routine cuts pilling in blends ..... Sept. 75
Glucosides reduce tendering chances in aniline black prints on cotton, rayon ..... June 74
How to utilize caustic economically – AATCC paper ..... Nov. 78
Imported fabrics give customers trouble ..... May 79
Latest word on quality – Textile Quality Control Assn. meeting ..... July 42
Light-screening agents confined to surface give best results ..... Sept. 75
Mangle increases drying speed ..... Sept. 137
Molecule size factor in determining wetfastness ..... Sept. 77
Nonwoven binders ..... Jan. 71
Organo-tin or germanium compounds help reduce static accumulation ..... Sept. 77
Peroxide bleaching system ..... June 74
Peroxide treatment stops discoloring in acetals ..... Sept. 76
Polyethylene amines play stabilizing role in improving U-F resins ..... Apr. 107
Protective finish, Nap-Guard ..... Apr. 140
Quaternary groups solubilize new dyes for acrylics and vinylidenes ..... Jan. 71
Reactive dyes combine with cellulose ..... Jan. 70
Reactive dyes today ..... Jan. 74
Research and development: the 4 big jobs, and how to do them – nine experts speak out – Executive Opinion ..... Feb. 44
Shrinkproofing process for woolens – interfacial polymerization ..... June 73
Silicone emulsion ..... Sept. 140
Soaping vat dyeings causes shade changes ..... June 73
Solvent-dyeing of triacetate fabrics variations ..... Jan. 70
Sulfonated oils may replace carriers ..... Apr. 107
Swelling agents speed heating of triacetates ..... Sept. 75
Textile guider made from aluminum ..... Sept. 138
Ultrasonic "grinding" speeds dye diffusion ..... June 75
Vat-dyeing of small lots improved with low-temperature padding ..... June 75
Weft straightener ..... Sept. 154

Cleaning
Card drive cuts cleaning costs ..... Feb. 119
Device cuts cleaning time 83% ..... Nov. 138
"Drag rag" saves $1,200 ..... Sept. 117
Floor sweeper, mechanical ..... June 112
Overhead traveling cleaner ..... Dec. 150
Roving clearer saves 80% in time ..... Aug. 106
Schedule reduces time 50% ..... Mar. 122
Shuttleless looms ..... July 30
Spinning clearer-roll cleaner ..... June 113
Trimming high yarn costs ..... Sept. 42
Weaveroom relocated down in the basement ..... Apr. 78

Cloth room
Bins use 100% warehouse space ..... Nov. 136
Constant tension machine ..... Dec. 148
Corduroy cutters break bottleneck ..... Mar. 90
Cutting room output up ..... Oct. 136
Fabric folder ..... Mar. 143
Filling handling today: what's new, what it does, how it boosts mill profits – report ..... Oct. 52
Hoist saves $2,500 annually ..... Mar. 124
Linear measuring device ..... Mar. 146
Shuttleless looms ..... July 30
Spray gun eliminates seconds due to grease ..... Nov. 137
Strapping costs cut ..... July 82
Strapping cuts shipping damage 50% ..... Dec. 123
Tensionless piece goods inspection ..... Dec. 140
Tenter handles 120-in. fabric ..... Mar. 137
Trimmer saves 1½ hours a day ..... May 113
Trucks halve fabric-handling costs ..... Aug. 106

Coated fabrics
Ethylose, modified cellulose, has finish applications ..... June 74
Foam laminates: today's hottest specialty – report ..... Aug. 45
Heat resistance lifted ..... Oct. 141
Metalized, plastic-to-fabric combinations Mylar laminated ..... Feb. 124
Nonskid coating ..... Dec. 133
Tuff-Tarp used in air-supported grain-storage buildings in Mexico ..... June 117
Vinyl-coated nylon ..... June 117

Cost control
Data processing today: problems, practices and payoff – report ..... Mar. 42
First Washington's turn . . . and now it's your turn (Ed) ..... June 39
Grantville story Pt 3 Controlling cost and quality ..... Aug. 62
Imports – President's seven-point program . . . and reaction in the industry – Executive Opinion ..... June 42
Mill costs and the new minimum wage ..... June 50
Office costs – how to hit mill office costs where they begin ..... Apr. 58
Trimming high yarn costs ..... Sept. 42
2-part success story – Pt 1: Better machines, better methods Pt 2: Can't-miss production control ..... Apr. 62
Winding cost trimmed 58% ..... June 47

Cotton (general)
Central Belt's crop: better ..... Jan. 57
Cotton crop news: Deltapine moves up ..... Mar. 68
Doff box cuts handling time ..... Jan. 102
Filling handling today: what's new, what it does, how it boosts mill profits – report ..... Oct. 52
If you want a crusade to join . . . (Ed) ..... Dec. 41
Imports – President's seven-point program. . . and reaction in the industry – Executive Opinion ..... June 42
Latest word on quality – Textile Quality Control Assn. meeting ..... July 42
1960 cotton – here's what you'll get ..... Apr. 66
No-hands doffing – U.S. style ..... Mar. 55
Quality control 1961: the experts speak out ..... Apr. 72
Research and development: the 4 big jobs, and how to do them – nine experts speak out – Executive Opinion ..... Feb. 44
Russians boost cotton yield with electricity ..... Aug. 101
Southeast cotton crop: poor ..... Dec. 69
Southeastern cotton – quality fair, production off ..... Feb. 112
Tex system conversion table ..... Mar. 51
Texas cotton – first report ..... Oct. 51
What's happening to cotton growing? ..... Nov. 126
What's new in cotton research ..... July 50

Cotton bleaching
Acid peroxide process solves color problems ..... Aug. 78
Better whites at little extra cost – AATCC paper ..... Nov. 77
Chlorite-bleaching cost cutting method ..... Feb. 77
Chlorite systems, buffered, cut down on corrosion ..... Apr. 108
Continuous chlorite bleaching ..... Nov. 69
Desize and bleach in one bath ..... May 80
Hot chlorite bleach liquors operated at pH 5.5 ..... Feb. 77
Hydantoin resins curb chlorite fumes ..... Dec. 78
Modernization cuts S-C-T's finishing costs ..... May 86
Peroxide bleaching system ..... June 74
Pretreatment with optical bleach ..... Sept. 77
Small towel mill boosts production with new machinery ..... May 61
Solvent degreasing of cotton ..... Apr. 108
Three-roll pad for better saturation of fabric with treating liquors ..... Feb. 77
Wood roll cuts finishing costs ..... June 112

Cotton blending
Blending feeder – same floor space – more bales blended ..... Mar. 137
Cleaning section removes 150% more trash ..... May 120
Conveyor system automates blending ..... Oct. 147
Flatless carding – will it pay off in your mill? ..... Dec. 66
From this big fire, a new start – Long Shoals Cotton Mills' Lincolnton, N.C. plant ..... Feb. 61
Juliette Milling – how this small mill stays competitive ..... Dec. 60
Mechanized spinning – a brand-new high ..... Jan. 58
Mill costs and the new minimum wage ..... June 50
Mixing picker ..... Sept. 138
Modernization program of 3-mill company totals $3.4-million ..... May 68
Short cut to better blending for cotton ..... Aug. 70
Small towel mill boosts production with new machinery ..... May 61
Trimming high yarn costs ..... Sept. 42
What's new in cotton research ..... July 50

Cotton carding
Alabama TOE sizes up nep reduction and spinning-frame maintenance ..... Feb. 66
Belting costs cut with hinged arm ..... June 113
Card drive cuts cleaning costs ..... Feb. 119
Card flat chain ..... Sept. 160
Card grinding cost cut 50% ..... Oct. 136
Card system increases production 200% ..... Nov. 151
Central Belt's crop fiber and spinning properties ..... Jan. 57
Clearer hinge saves $400 annually ..... May 114
Clearer waste at cards eliminated ..... July 83
Coilers handle 48-in. cans ..... Oct. 148
Flatless carding – will it pay off in your mill? ..... Dec. 66
From this big fire, a new start – Long Shoals Cotton Mills' Lincolnton, N.C. plant ..... Feb. 61
Grantville story Pt 1 Getting set for top efficiency, top yarn quality ..... Aug. 54
How one company makes good ideas come alive – modernization at West Point Mfg. Co. ..... May 42
How to make a fast comeback – Mary-Leila Cotton Mills, Inc. ..... Feb. 107
Hungarian process decreases sliver deformity ..... May 67
Japanese machine feeds cards from hopper ..... Feb. 51
Lap conveyor solves storage problems ..... Apr. 134
Lap handling method saves $10,000 ..... Feb. 119
Lap train cuts handling ..... Apr. 136
Mechanized spinning – a brand-new high ..... Jan. 58
Metallic card clothing looks good ..... Dec. 70
Mill costs and the new minimum wage ..... June 50
Modernization program of 3-mill company totals $3.4-million ..... May 68
Producing better yarn ..... June 69
Quality control 1961: the experts speak out ..... Apr. 72
Quality control updated ..... Oct. 74
Reclothing process ..... Dec. 148
Small towel mill boosts production with new machinery ..... May 61
Southeastern cotton – quality fair, production off ..... Feb. 112
Stop bad chokes at cards ..... Oct. 134
Texas cotton – first report ..... Oct. 51
Threat from the Far East: eyewitness report from W.S. Montgomery ..... Nov. 38
Trimming high yarn costs ..... Sept. 42

Cotton combing
Comber clearer ups production 35% ..... July 84
Modernization program of 3-mill company totals $3.4-million ..... May 68
Signal system cuts downtime ..... May 113
Quality control updated ..... Oct. 74

Cotton drawing
Alabama TOE sizes up nep reduction and spinning-frame maintenance ..... Feb. 66
Drawing at 800 FPM ..... June 131
From this big fire, a new start – Long Shoals Cotton Mills' Lincolnton, N.C. plant ..... Feb. 61
Grantville story Pt 1 Getting set for top efficiency, top yarn quality ..... Aug. 54
Handling cuts cost 50% – fast warehousing plus bulk storage ..... Apr. 70

How to make a fast comeback – Mary-Leila Cotton Mills, Inc. Feb. 107
Juliette Milling – how this small mill stays competitive Dec. 60
Mechanized spinning – a brand-new high Jan. 58
Modernization of 3-mill company totals $3-4-million May 68
No-hands doffing – U.S. style Mar. 55
Producing better yarn June 69
Quality control updated Oct. 74
Small towel mill boosts production with new machinery May 61
Threat from the Far East: eyewitness report from W.S. Montgomery Nov. 38
Trimming high yarn costs Sept. 42

Cotton dyeing
Alkaline bath for applying vat dye in pigment form Mar. 75
AATCC meeting gives dyers answers to reactive dye problems Oct. 89
Ammonia in rinse water speeds up rinsing out of soap Jan. 71
Ciba process for good wool-cotton unions July 62
Consolidation pays off big for Phoenix Dye Works June 88
Crockfastness of naphthol-dyed goods improved with acid after treatment June 75
Czechs use isotope to measure pad uniformity Aug. 101
Drainage system betters drying July 82
Drainage system boosts dryer production Mar. 124
Duplicator eliminates cost of mistakes Feb. 120
Dye-pad downtime cut 50% Sept. 117
Dye-plant modernization pays off three ways Apr. 120
Epsom salt in stripping down dyed goods Mar. 75
Fugitive tint Apr. 154
Glucosides reduce tendering chances in aniline black prints on cotton, rayon June 74
Hydraulic drive on dyebecks cuts time in half Feb. 118
Jigs boost load, cut costs Apr. 136
Lightfastness better when dyes are in aggregate form Nov. 71
Modernization cuts S-C-T's finishing costs May 86
Moisture meter controls slasher drying speed Aug. 121
One-bath process dyes Dacron-cotton Dec. 77
Overdrying brings problems later – AATCC paper Nov. 78
Polyester-wool blends dyeing Apr. 144
Predryer ups pad dyeing by 10 YPM Nov. 137
Pressurized beck Nov. 152
Reactive dye batches mixed continuously June 84
Reactive-dye retarders Dec. 77
Reactive dyes combine with cellulose Jan. 70
Reactive dyes confer small amount of crease resistance to cottons dyed with them May 81
Reactive dyes on fabric Nov. 70
Reactive dyes reduce tear strength and increase crease-recovery properties of cellulosic fibers Mar. 75
Reactive dyes today Jan. 74
Reactive vat dyes: Swiss say they're easy to apply Sept. 77
Redox-potential on batch-dyeing jobs May 79
Reducing agent helps skein dyeing Apr. 108
Rugs, backings dyed at same time Feb. 76
Sharp temperature changes in treating baths can cause uneven beam dyeing June 75
Slat expander Nov. 156
Soap and soft water best for washing off residues of reactive dyes May 81
Soaping vat dyeings causes shade changes June 73
Substantivity important in long-bath dyeing with reactive dyes June 76
Tube stripper triples output Apr. 135
Variations in density of yarn packages don't effect dyeing results Apr. 109
Vat-dyeing of small lots improved with low-temperature padding June 75
Vat dyes best to cover over-bleached areas in cotton goods July 64
Vat dyeing today Pt 1 Mar. 78, Pt 2 Apr. 114, Pt 3 June 80, Pt 4 July 70, Pt 5 Aug. 84, Pt 6 Sept. 80, Pt 7 Oct 96, Pt 8 Nov. 94, Pt 9 Dec 84
Wood roll cuts finishing costs June 112

Cotton fabrics
Elastic cloths Jan. 110
Faster weaving – Alabama TOE meeting July 55
Filling handling today: what's new, what it does, how it boosts mill profits – report Oct. 52
Hoist saves $2,500 annually Mar. 124
How one company makes good ideas come alive—modernization at West Point Mfg. Co. May 42
On-the-job training to boost growth Sept. 64
Shuttleless looms July 30
Small towel mill boosts production with new machinery May 61

Cotton fiber
Central Belt's crop fiber properties Jan. 57
Cotton crop news: Deltapine moves up Mar. 68
Identifying today's fibers – report Dec. 47
Latest word on quality – Textile Quality Control Assn. meeting July 42
1960 cotton – here's what you'll get Apr. 66
Russians boost cotton yield with electricity Aug. 101
Russians make cotton concrete May 67
Southeastern cotton – quality fair, production off Feb. 112
What's new in cotton research July 50

Cotton finishing
Agitate wash liquor to improve effect Apr. 107
Ammonia in rinse water speeds up rinsing out of soap Jan. 71
Belfast finish application Mar. 75
Better whites at little extra cost – AATCC paper Nov. 77
Brightener inhibitor helps retain shade Apr. 109
British develop new catalysts that will improve tear strength Dec. 78
Brushing machine for knit goods Oct. 148
Canvas lasts longer with right kind of protection Aug. 94
Combining production operations saves labor Apr. 135
Control APO finish yellowing – Chemical Finishing Conference paper Dec. 94
Controls boost dry-can performance Mar. 123
Corduroy cutters break bottleneck Mar. 90
Crosslinker offers good wash-wear effects Aug. 77
Czechs use isotope to measure pad uniformity Aug. 101
Detergents causing complaints of poor light-fastness Jan. 71
Diesters are base for new finishes Dec. 77
Drainage system betters drying July 82
Electrons help in hydrolysis of resins – Chemical Finishing Conference paper Dec. 96
Embossed foil checks nips quickly May 116
Ethylose, modified cellulose, has finish applications June 74
Extractor padder June 146
Extractor removes water June 138
Fabric construction effect on W&W – Chemical Finishing Conference paper Dec. 94
Film-formers provide drip-dry finish Apr. 109
Flameproofing formula, modified, retains more strength Mar. 75
Flameproofing provided by organic phosphonate Apr. 108
Flash steamer uses two heated cylinders July 92
Fluidized-bed drying cuts surface-resin May 80
Fluorocarbon silicones provide oil-stain repellency resistant to laundering Nov. 71
Foam laminates: today's hottest specialty – report Aug. 45
Formaldehyde now safe for wash-and-wear? Nov. 71
German process makes water repellent durable Sept. 76
German process promises better water repellency Feb. 76
Handling cuts cost 50% – fast warehousing plus bulk storage Apr. 70
Humidity affects crease recovery – Chemical Finishing Conference paper Dec. 94
Knit goods dryer June 142
Laminating vinyl to fabric Sept. 89
Latest word on quality – Textile Quality Control Assn. meeting July 42
Latex is base for CRF Feb. 75
Machine does two jobs at once – and non-stop, too Dec. 139
Magnets eliminate clip damage Nov. 136
Mangle increases drying speed Sept. 137
Metallic salts improve fabric properties July 61
Mill costs soft spot – poor lubrication June 55
Modernization cuts S-C-T's finishing costs May 86
Modified starches give crease-resistant finishes Nov. 69
Nonresinous finishes hit the competitive crease-resistant finishes market July 62
Non-stop finishing June 137
Overdrying brings problems later – AATCC paper Nov. 78
Overstretching improves filling strength – Chemical Finishing Conference paper Dec. 94
Peroxide treatment stops discoloring in acetals Sept. 76
Phosphates give durable flameproofing, soft hand Aug. 79
Plasticizing flock will give you printed patterned effects Aug. 78
Predryer ups pad dyeing by 10 YPM Nov. 137
Pressure-sensitive tape to differentiate between water repellent finishes Mar. 75
Prestwick – a new cotton finish from an old reactant Dec. 109
Reactive dyes today Jan. 74
Research and development: the 4 big jobs, and how to do them – nine experts speak out – Executive Opinion Feb. 44
Resiliency improvements – goal of research Jan. 70
Resin finishes for cotton in 1960 Nov. 71
Resin for wash-and-wear doesn't retain chlorine Nov. 69
Resin stops rotting, mildew in cotton yarn Oct. 91
Resin treatment, Japanese, helps abrasion resistance May 79
Resins boost durability of fluorocarbon-based finishes Apr. 108
Shears both sides in one run at 190 ypm Dec. 139
Silicone catalysts promise more stability Feb. 75
Slat expander Nov. 156
Sodium bisulfite – antichlor for resin-finished goods Jan. 71
Soiling of finished cottons to be studied Aug. 78
Steam finishing June 152
Steaming and shrinking machine Mar. 148
Stretch and bulk for your cotton products – Chemical Finishing Conference paper Dec. 96
Tenter handles 120-in. fabric Mar. 137
Textile guider made from aluminum Sept. 138
Tumbler dryer June 144
USDA's Southern Division studies crosslinking of cotton cellulose Feb. 77
Wash-and-wear finish looks good – AATCC paper Nov. 77
Wash-wear finishing tear strength improved with amide lubricants May 81
Wash-wear keeps 'em talking – Chemical Finishing Conference papers Dec. 92
Wash-and-wear news highlights Dutch Textile Conference Nov. 70
Water repellency from paraffin, metal alcoholates May 81
Water repellents are acid-free Oct. 91
Water repellents combined for better wash-fastness July 61
Weft straightener Sept. 154
Wet brushing machine Mar. 150
Wood roll cuts finishing costs June 112
Wool-like warmth – cotton research goal Dec. 77

Cotton mills
Filling handling today: what's new, what it does, how it boosts mill profits – report Oct. 52
From this big fire, a new start – Long Shoals Cotton Mills' Lincolnton, N.C. plant Feb. 61
How to make a fast comeback – Mary-Leila Cotton Mills, Inc. Feb. 107
Juliette Milling – how this small mill stays competitive Dec. 60
Mill costs and the new minimum wage June 50
Old mill gets a facelifting May 64
Shuttleless looms July 30
Small towel mill boosts production with new machinery May 61

Cotton opening
Cleaning section removes 150% more trash May 120
Conversion kits improve weighing feeds Nov. 151
From this big fire, a new start – Long Shoals Cotton Mills' Lincolnton, N.C. plant Feb. 61
Grantville story Pt 1 Getting set for top efficiency, top yarn quality Aug. 54
How to make a fast comeback – Mary-Leila Cotton Mills, Inc. Feb. 107
Japanese machine feeds cards from hoppers Feb. 51
Juliette Milling – how this small mill stays competitive Dec. 60
Mechanized spinning – a brand new high Jan. 58
Mill costs and the new minimum wage June 50
Opener removes 25% more waste Dec. 122
Producing better yarn June 69
Small towel mill boosts production with new machinery May 61
Trimming high yarn costs Sept. 42

Cotton picking
Alabama TOE sizes up nep reduction and spinning-frame maintenance Feb. 66
Grantville story Pt 1 Getting set for top efficiency, top yarn quality Aug. 54
How to make a fast comeback – Mary-Leila Cotton Mills, Inc. Feb. 107
Japanese machine feeds cards from hoppers Feb. 51
Juliette Milling – how this small mill stays competitive Dec. 60
Mechanized spinning – a brand-new high Jan. 58
Mill costs and the new minimum wage June 50
Producing better yarn June 69
Quality control updated Oct. 74
Trimming high yarn costs Sept. 42

Cotton printing
Alkyld resins speed vat-dye printing Mar. 74
Crosslinking binders improve pigment prints June 74
Discharge printing tips July 76
Drainage system betters drying July 82
Drainage system boosts dryer production Mar. 124
Helical pitching device Apr. 144
Pigment dyeing – two new binding systems July 63
Plasticizing flock will give you printed patterned effects Aug. 78
Predryer ups pad dyeing by 10 YPM Nov. 137
Prints both sides in one pass Aug. 122
Reactive dyes today Jan. 74
Recorder ups output 20% Sept. 118
Roller printing with 12 colors July 91
Screen printer with super precision Feb. 132
Sodium metaborate reduces tendency of bronze powders to tarnish after printing Dec. 79
Starch ethers work with reactive dyes Aug. 77
Ten-color printer Sept. 137
Terry towels, hottest thing in printing Feb. 82
Tips on emulsion printing Sept. 93
Traveling dryer speeds printing 30% Aug. 106
Vat dyeing today Pt 1 Mar. 78
Wood roll cuts finishing costs June 112

Cotton roving
Clearer saves 80% in time Aug. 106
Doff box cuts handling time Jan. 102
Four wraps of roving on flyer pressers May 112
From this big fire, a new start – Long Shoals Cotton Mills' Lincolnton, N.C. plant Feb. 61
Grantville story Pt 1 Getting set for top efficiency, top yarn quality Aug. 54
Hidden roving variation – what to do Apr. 86
High-speed flyers for roving fraue change-overs June 132
How to make a fast comeback – Mary-Leila Cotton Mills, Inc. Feb. 107
Juliette Milling – how this small mill stays competitive Dec. 60
Modernization of 3-mill company totals $3.4-million May 68
No-hands doffing – U.S. style Mar. 55
Producing better yarn June 69
Quality control updated Oct. 74
Roving can of vulcanized-fiber May 136
Small towel mill boosts production with new machinery May 61

Cotton sizing
Alabama TOE meeting – better size making July 55
Georgia TOE meeting Dec. 71
How one company makes good ideas come alive – modernization at West Point Mfg. Co. May 42
Quality control updated Oct. 74
Shuttleless looms July 30
Sizing machine Mar. 153
Slasher control Sept. 162
Slashers and loom equipment – Georgia TOE men see more speed, higher quality Jan. 65
Starch cooker Dec. 140
Teflon improves warp quality 15% Oct. 135

Cotton spinning and twisting
Alabama TOE sizes up nep reduction and spinning-frame maintenance Feb. 66
Apron with inner lining cuts ends down 50% July 84
Balloon control ring Dec. 148
Bobbin barrels Apr. 150
Bobbin builder eliminated winding and quilling Aug. 122
Cartridge weighting on high-draft spinning May 135
Central Belt's crop spinning properties Jan. 57
Cleaning needle-bearing rolls May 113
Cleaning schedule reduces time 50% Mar. 122
Clearer-roll cleaner June 113

Cost down, quality up with twisting and winding modernization ... July 35
Cotton research – what's new ... July 50
Creel cuts handling time 50% ... Mar. 122
Czechoslovakian spindle runs on oil film ... Feb. 51
Czechs develop one-step fiber-to-yarn spinning ... Nov. 37
Device cuts cleaning time 83% ... Nov. 138
Direct spinning ... Oct. 148
Doff box cuts handling time ... Jan. 102
Drafting system – 20% stronger yarn ... Mar. 138
"Drag rag" saves $1,200 ... Sept. 117
Filling handling today: what's new, what it does, how it boosts mill profits – report ... Oct. 52
Four-point cam ups output 10% ... Aug. 108
Four wraps of roving on flyer pressers ... May 112
From this big fire, a new start – Long Shoals Cotton Mills' Lincolnton, N.C. plant ... Feb. 61

Hydrostatic unit cuts vibration ... Dec. 140
Juliette Milling – how this small mill stays competitive ... Dec. 60
Knock-off motion cuts rewinding costs ... Sept. 117
Mechanized spinning – a brand-new high ... Jan. 58
Metallic card clothing looks good ... Dec. 70
Mill costs and the new minimum wage ... June 50
Modernization of 3-mill company totals $3.4-million ... May 68
Modified quill holds 20% more yarn ... Apr. 136
No-hands doffing – U.S. style ... Mar. 55
Nylon cradle for spinning rolls ... Jan. 114
Producing better yarn ... June 69
Quality control updated ... Oct. 74
Resin stops rotting, mildew in cotton yarn ... Oct. 91
Ring twister ... June 151
Roll testing in 20 seconds ... May 118
Small towel mill boosts production with new machinery ... May 61
Southeast cotton crop: poor ... Dec. 69
Southeastern cotton – quality fair, production off ... Feb. 112
Spinning-frame change-over ... Sept. 150
Spinning frame modified ... Dec. 140
Spinning ring ... Nov. 152
Spinning ring design ... Nov. 161
Swivel arm increases packaging size ... Sept. 118
Tape-cutting cost cut $1,500 ... Feb. 120
Tex system conversion table ... Mar. 51
Texas cotton – first report ... Oct. 51
Threat from the Far East: eyewitness report from W.S. Montgomery ... Nov. 38
Trimming high yarn costs ... Sept. 42
Twister stops automatically ... May 136
Yardage counter ... June 132

Cotton warp preparation and beaming

Alabama TOE – more roll know-how ... July 55
Beam holder offers 100% selection ... Feb. 131
Controlling warp stretch ... June 132
Controls tension automatically ... July 92
Creel tension unit ... Apr. 164
Filling handling today: what's new, what it does, how it boosts mill profits – report ... Oct. 52
How one company makes good ideas come alive – modernization at West Point Mfg. Co. ... May 42
Latest word on quality – Textile Quality Control Assn. meeting ... July 42
Mill costs and the new minimum wage ... June 50
Moisture meter controls slasher drying speed ... Aug. 121
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. ... June 60
Shuttleless looms ... July 30
Size-box rolls save money ... July 82
Slasher drive ... Nov. 161

Cotton weaving

Binder replacement cut 50% ... Sept. 116
Bobbin costs cut 25% ... June 114
Bobbin tester ... Dec. 154
British develop shuttleless picking device ... Aug. 101
Carpet mill expansion – good way to spend $1½-million ... Jan. 98
Cloth upgraded $5.92 per loom, a week ... July 84
Filling handling today: what's new, what it does, how it boosts mill profits – report ... Oct. 52
Georgia TOE meeting ... Dec. 71
Harness eye stops scoring ... June 132
How one company makes good ideas come alive – modernization at West Point Mfg. Co. ... May 42
Idler gear ... Oct. 174
Jackstick with sliding cuff ... Mar. 138
Loom drive ... Oct. 180
Loom studies for solution of weave-room troubles ... Feb. 114
Loom winder ... Aug. 134
Mill costs – soft spots for cost cuts in weaving ... June 53
Modified quill holds 20% more yarn ... Apr. 136
Nylon harness eye ... Mar. 140
Nylon pattern chains, colored ... Jan. 114
Pickers save time and money ... Jan. 102
Pickerstick in two styles ... Apr. 159
Reducing loom stops with central lubrication ... June 131
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. ... June 60
Shuttleless looms ... July 30
Slashers and loom equipment – Georgia TOE men see more speed, higher quality ... Jan. 65
Tape weaving versatility with narrow-fabric loom ... Apr. 144
Truck cuts two men from lifting job ... Apr. 135
Weaveroom relocated down in the basement ... Apr. 78

Cotton winding

Automatic winder ... July 100
"Buggy" speeds cone packing 50% ... Dec. 124
Cost trimmed 58% ... June 47
Creel cuts handling time 50% ... Mar. 122
Doff box cuts handling time ... Jan. 102
Filling handling today: what's new, what it does, how it boosts mill profits – report ... Oct. 52
Grantville story Pt 1 Getting set for top efficiency, top yarn quality ... Aug. 54
Hand truck to speed unloading ... Dec. 148
How to make a fast comeback – Mary-Leila Cotton Mills, Inc. ... Feb. 107

Today's way to handle people July 38
Training specialists maintenance demands today Aug. 68
TWUA complains May 130
2-part success story – Pt 1: Better machines, better methods Pt 2: Can't-miss production control Apr. 62
Warehousing costs cut 40% Feb. 119
Weaveroom relocated down in the basement Apr. 78
Who says you can't do business with Uncle Sam? Oct. 46
Winder boosts worker productivity 100% Sept. 120
Your next modernization target: that old industry image (Ed) May 39
Your next move: update that organization May 52

Man-made fibers (general
Acrylics that don't deluster Dec. 77
Acrylonitrile grafts reduce shrinkage boost strength and dyeability of fibers Mar. 74
Additives improve polyester fibers Nov. 69
Agilon edge-crimped yarn – latest word in texturing Jan. 54
Avicolor, new name for Colorspun trademark May 124
Boat cover of vinyl "laminated" nylon Nov. 141
British develop flame-resistant acetate yarn Nov. 37
Building and starting a new tufted-carpet mill Apr. 82
Built-in bacteriastat cuts odor formation May 80
Bulk put back in package-dyed orlon with simple assembly Aug. 52
Carter Bros., Inc. – imagineering a brand-new company image Sept. 48
Ceramic fiber, Fiberfrax Jan. 110
Chromspun adds three colors May 123
Copper compounds increase stability of polyamides to high temperatures June 75
Cuprammonium rayon, Tusson Mar. 130
Dacron strength upped Dec. 133
Discarded fan cuts rehandling costs Dec. 124
Dynel flocked with rayon fibers July 87
Fiber modifications, grafts improve polypropylene dyeing Dec. 78
Filling handling today: what's new, what it does, how it boosts mill profits – report Oct. 52
Firth Carpet's Laurens, S.C. plant – managing for better handling and better production Mar. 58
Gamma-ray grafts Nov. 141
Gerfil – new man-made fiber Dec. 133
Heavy-denier acrylic staple fibers Dec. 133
Hitco-C fibers for rockets Sept. 129
How fibers react to tensile strains Sept. 52
How one company makes good ideas come alive – modernization at West Point Mfg. Co. May 42
Identifying today's fibers – report Dec. 47
Japanese find cheaper way to make nylon Nov. 37
Multifilament modacrylic yarn Aug. 111
Nylon color contrast upped Oct. 141
Nylon fiber identity test Mar. 74
Nylon, HT-1, coming next year July 87
Nylon protected against sunlight by addition of salts May 81
Nylon tire cord production up June 117
Nylon, two tone Dec. 133
Nylon Type FRN Feb. 124
Nylon, vinyl-coated Mar. 130
Orlon – new types Jan. 109
Outdoor furniture webbing product packaged Nov. 141
Pile fabrics – modernizing by creating a new product – Borg Fabric Div. May 57
Pillow-filling material, Dacron 99 Nov. 141
Polyamino acid has textile-fiber potential Jan. 71
Polynosic gets nod July 87
Polypropylene film, Olefane "U" Mar. 130
Polyurethane pillows Nov. 141
Raschel lace designs in Taslan May 123
Rayon combinations Dec. 133
Rayon, crimped cross-linked Jan. 110
Regenerated fibers' strength improved July 61
Research and development: the 4 big jobs, and how to do them – nine experts speak out – Executive Opinion Feb. 44
Russians develop way to make methylvinyl pyridine from petroleum waste Feb. 51
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. June 60
Single-bath piece dyeing Aug. 111
Spandex improves Dec. 133
Styrene grafts improve nylon weathering – AATCC paper Nov. 77
Tartaric acid for super-white yarns Aug. 77
Teflon for packing pumps Nov. 141
Tex system conversion table Mar. 51
Textured modacrylic carpet fiber Aug. 111
Tire cord, Tyrex rayon Feb. 124
Tow made into top on tow transformer Feb. 131
Tufted-carpet mill – building and starting a new mill Apr. 82
Tusson for curtains and drapery fabrics May 123
Vairin, elastic yarn from Italy May 124
Woven fabric, Bellezea May 124
Zefran improved July 87

Man-made fiber blending
Blending feeder – same floor space – more bales blended Mar. 137
Material handling goes automatic in Firth Carpet's Burnsville, N.C. mill Feb. 52
Mixing picker Sept. 138
Modernizing by creating a new product – Borg Fabric Div. May 57

Man-made fiber carding
Card flat chain Sept. 160
Coilers handle 48-in. cans Oct. 148
Hungarian process decreases sliver deformity May 67
Material handling goes automatic in Firth Carpet's Burnsville, N.C. mill Feb. 52
Modernizing by creating a new product Borg Fabric Div. May 57

Man-made fiber drawing
Drawing at 800 FPM June 131
Material handling goes automatic in Firth Carpet's Burnsville, N.C. mill Feb. 52

Man-made fiber dyeing
Acetate tricots soaked prior to dyeing – time factor July 63
Acrylic fiber treatment increases dye uptake Feb. 77
Acrylonitrile grafts reduce shrinkage boost strength and dyeability of fibers Mar. 74
Additives improve polyester fibers Nov. 69
Amines, heat boost dye pickup Feb. 77
Anthraquinone improves discharge whites Mar. 73
British develop dyebath to identify acrylic fibers Oct. 90
Bulk put back in package-dyed orlon with simple assembly Aug. 52
Carpets of muted colors show less soil May 81
Cationic agents help to level dyeing of acrylic fibers Nov. 71
Cationic basic dyes useful in dyeing polypropylene fibers Oct. 91
Consolidation pays off big for Phoenix Dye Works June 88
Continuous acetate dyeing with wool dyes Nov. 69
Controls boost dry-can performance Mar. 123
Crepe – finishing top-quality textured crepe Jan. 86
Cresian ups whiteness Nov. 141
Cyclic amines modify polyester fibers Mar. 73
Czechs use isotope to measure pad uniformity Aug. 101
Depth of shade improved in acetate dyeing July 64
Developed blacks on triacetate goods diazotized after developing Apr. 109
Discarded fan cuts rehandling costs Dec. 124
Dispersing agents may hinder shade buildup May 80
Drainage system betters drying July 82
Dye application to polypropylene June 75
Dye carriers wash out easily Dec. 77
Dyeing 5-dozen stockings in 7 minutes Jan. 113
Dyeing 5 times as much at Thrift Dye Works Oct. 107
Dyeing and setting stretch yarns in one process Feb. 75
Embossed foil checks nips quickly May 116
Fiber modifications, grafts improve polypropylene dyeing Dec. 78
Fugitive tint Apr. 154
Glucosides reduce tendering chances in aniline black prints on cotton, rayon June 74
Heat-treat polyesters to boost stability and dye potential Feb. 75
Heatsetting minimizes differences between triacetate and polyester fibers Oct. 91
High acidity for better formaldehyde fixation Feb. 76
Hydraulic drive on dyebacks cuts time in half Feb. 118
Jet-dyeing machine – inside view May 79
Jigs boost load, cut costs Apr. 136
Material handling goes automatic in Firth Carpet's Burnsville, N.C. mill Feb. 52
Mercury switch cuts seconds to zero Sept. 116
Modernizing step by step at Kenyon Piece Dye Works, Inc. May 90
Moisture meter controls slasher drying speed Aug. 121
New ways to handle polyester blends – AATCC paper Nov. 80
Nylon hosiery – lower temperatures help good unions between top and body Sept. 77
Nylon less absorptive than polyester-type fibers Oct. 91
Old sliver cans cut handling 10% Mar. 124
One-bath process dyes Dacron-cotton Dec. 77
Oxidizing common bases means better blacks for nylon Sept. 77
Pigments insoluble in melt suitable for coloring polyamide fibers Apr. 109
Polyester fibers made more resistant to light with benzophenone compounds Jan. 70
Polyester-wool blends dyeing Apr. 144
Polypropylene, dyeable Aug. 111
Premetalized dyes boost triacetate washfastness Sept. 76
Prepared carriers go direct to dyebath July 62
Reactive dye, Remazol Black B for Acrilan May 81
Reactive dye batches mixed continuously June 84
Reactive dyes combine with cellulose Jan. 70
Reactive dyes today Jan. 74
Rugs, backings dyed at same time Feb. 76
Single-bath piece dyeing Aug. 111
Skein dyer controls acrylic shrinkage Oct. 147
Sodium-formate treatment improves acrylic heat resistance Sept. 76
Solution promoters improve polyester dyeing Oct. 90
Solvent-dyeing methods reaching commercial stage, Swiss reveal Mar. 73
Sulfonated oils may replace carriers Apr. 107
Triacetate fabrics solvent-dyeing variations Jan. 70
UV absorbers mean better lightfastness – AATCC paper Nov. 80
Vat-dyeing of small lots improved with low-temperature padding June 75
Vat dyeing today Pt 2 Apr. 114
Pt 3 June 80 Pt 5 Aug 84
Pt 7 Oct. 96
Vinyl pyridines can boost Vinal dye pickup Feb. 76

Man-made fiber fabrics
Bags now knitted Sept. 129
Blanket of 100% Cresian Apr. 140
Casement fabric like silk and mohair Aug. 111
Dynalure pile lining due July 87
Dynel to decorate Sept. 129
Filament-textured acetate yarn for bedspreads Sept. 129
Filling handling today: what's new, what it does, how it boosts mill profits – report Oct. 52
Fire-resistant cloth, Kamclad Aug. 111
Liner with minimum-shrinkage debuts July 87
Nylon, moldable Sept. 129
Nylon – satin and plain May 124
Nylon, uncoated for tents May 124
Pile fabrics – modernizing by creating a new product – Borg Fabric Div. May 57
Quality control 1961: the experts speak out Apr. 72
Windway – new sheer casement fabric Mar. 129

Man-made fiber finishing
Agitate wash liquor to improve effect Apr. 107
Benzophenone derivatives but light damage on nylons Sept. 75
Brushing machine for knit goods Oct. 148
Controls boost dry-can performance Mar. 123
Crease resistance for spun-rayon fabrics Feb. 91
Crepe – finishing top-quality textured crepe Jan. 86
Cyclic amines modify polyester fibers Mar. 73
Czechs use isotope to measure pad uniformity Aug. 101
Detergents give good antistatic effects Oct. 89
Drainage system betters drying July 82
Dyeing 5 times as much at Thrift Dye Works Oct. 107
Extractor removes water June 138
Flameproof, nondrip coating for man-made fiber fabric Sept. 76
Flameproofing provided by organic phosphonate Apr. 108
Flash steamer uses two heated cylinders July 92
Fluidized-bed drying cuts surface-resin May 80
Foam laminates: today's hottest specialty-report Aug. 45
French finishing routine cuts pilling in blends Sept. 75
German process promises better water repellency Feb. 76
Glycol treatment raises safe ironing temperatures of triacetate fabrics Jan. 70
Light-screening agents confined to surface give best results Sept. 75
Lithium chloride as antistatic agent Apr. 109
Lowered water-imbibition property of resin-treated rayons chief cause of poor abrasion resistance June 76
Mangle increases drying speed Sept. 137
Mill costs soft spot – poor lubrication June 55
Modernizing by creating a new product – Borg Fabric Div. May 57
Modernizing step by step at Kenyon Piece Dye Works, Inc. May 90
Non-stop finishing June 137
Nylon flameproofed with thiourea resins Aug. 78
Nylon – one helps another become more hydrophilic Sept. 75
Organo-tin or germanium compounds help reduce static accumulation Sept. 77
Plasticizing flock will give you printed patterned effects Aug. 78
Reducing fiber strength revealed as new way to eliminate pilling Oct. 90
Research and development: the 4 big jobs, and how to do them – nine experts speak out – Executive Opinion Feb. 44
Resin-polyethylene oxide finish eliminates man-made-fiber static Sept. 77
Resins boost durability of fluorocarbon-based finishes Apr. 108
Saturated steam better for setting nylon fabrics Nov. 71
Screening agent that protects olefin film from sunlight useless when used for coating fiber surfaces Aug. 79
Shears both sides in one run at 190 ypm Dec. 139
Silicone catalysts promise more stability Feb. 75
Sodium-formate treatment improves acrylic heat resistance Sept. 76
Spray gun eliminates seconds due to grease Nov. 137
Steaming and shrinking machine Mar. 148
Swelling agents speed heating of triacetates Sept. 75
Tenter handles 120-in. fabric Mar. 137
Textile guider made from aluminum Sept. 138
Weft straightener Sept. 154
Wet brushing machine Mar. 150
Wood roll cuts finishing costs June 112

Man-made fiber picking
Material handling goes automatic in Firth Carpet's Burnsville, N.C. mill Feb. 52

Man-made fiber printing
Acid-chlorate treatment improves acrylic whites Oct. 90
Chemical process burns out designs Aug. 79
Controls boost dry-can performance Mar. 123
Crosslinking binders improve pigment prints June 74
Drainage system betters drying July 82
Ethylene oxide condensates improve printing results, German firm finds May 80
Helical pitching device Apr. 144
Plasticizing flock will give you printed patterned effects Aug. 78
Prints both sides in one pass Aug. 122
Procinyl-type reactive dyes give prints of excellent washfastness on triacetate fibers Sept. 77

Reactive dyes today — Jan. 74
Roller printing with 12 colors — July 91
Screen printer with super precision — Feb. 132
Ten-color printer — Sept. 137
Traveling dryer speeds printing 30% — Aug. 106

Man-made fiber roving
High-speed flyers for roving frame change-overs — June 132
Modernizing by creating a new product – Borg Fabric Div. — May 57
Roving can of vulcanized-fiber — May 136

Man-made fiber sizing
Firth Carpet's Laurens, S.C. plant – managing for better handling and better production — Mar. 58
Loom-beam capacity doubles — Mar. 122
Mill costs – soft spots for cost cuts in weaving — June 53
Sizing machine — Mar. 153
Slasher control — Sept 162
Starch cooker — Dec. 140
Teflon improves 'warp quality 15% — Oct. 135

Man-made fiber, solution-dyed
Carter Bros., Inc. – imagineering a brand-new company image — Sept. 48
Pigments insoluble in melt suitable for coloring polyamide fibers — Apr. 109
Tusson in solution-dye colors — Aug. 111

Man-made fiber spinning
Acrylics that don't deluster — Dec. 77
Balloon control ring — Dec. 148
Bobbin barrels — Apr. 150
Bobbin builder eliminates winding and quilling — Aug. 122
Cartridge weighting on high-draft spinning — May 135
Drafting system – 20% stronger yarn — Mar. 138
Filling handling today: what's new, what it does, how it boosts mill profits report — Oct. 52
Hand truck to speed unloading — Dec. 148
Hydrostatic unit cuts vibration — Dec. 140
Material handling goes automatic in Firth Carpet's Burnsville, N.C. spinning mill — Feb. 52
Polyphosphate additive protects nylon from sunlight — Aug. 78
Spinning frame — June 146
Spinning-frame change-over — Sept. 150
Spinning frame modified — Dec. 140
Twister stops automatically — May 136

Man-made fiber throwing
Agilon edge-crimped yarn production data — Jan. 54

Man-made fiber tow
Tow made into top on tow transformer — Feb. 131
Turbo can — Sept. 144

Man-made fiber twisting
Bobbin barrels — Apr. 150
Material handling goes automatic in Firth Carpet's Burnsville, N.C. mill — Feb. 52
Ring twister — June 151
Yardage counter — June 132

Man-made fiber warp preparation and beaming
Beam holder offers 100% selection — Feb. 131
Controlling warp stretch — June 132
Controls tension automatically — July 92
Creel tension unit — Apr. 164
Filling handling today: what's new, what it does, how it boosts mill profits – report — Oct. 52
Grantville story Pt 1 Getting set for top efficiency, top yarn quality — Aug. 54
Moisture meter controls slasher drying speed — Aug. 121
Weaving narrow fabrics at 2,000 picks per minute — Mar. 48

Man-made fiber weaving
Binder replacement cut 50% — Sept. 116
Bobbin costs cut 25% — June 114
Bobbin tester — Dec. 154
British develop shuttleless picking device — Aug. 101
Carpet mill expansion – good way to spend $1½-million — Jan. 98
Cloth upgraded $5.92 per loom, a week — July 84
East German machine makes fabrics by sewing — Feb. 51
Filling handling today: what's new, what it does, how it boosts mill profits – report — Oct. 52
Firth Carpet's Laurens, S.C. plant – managing for better handling and better production — Mar. 58
Harness eye stops scoring — June 132
Idler gear — Oct. 174
Jackstick with sliding cuff — Mar. 138
Loom-beam capacity doubles — Mar. 122
Loom drive — Oct. 180
Loom studies for solution of weave-room troubles — Feb. 114
Loom winder — Aug. 134
Mill costs – soft spots for cost cuts in weaving — June 53
Newest way to count picks — Sept. 47
Nylon harness eye — Mar. 140
Nylon pattern chains, colored — Jan. 114
Pickers save time and money — Jan. 102
Pickerstick in two styles — Apr. 159
Rayon, Avisco XL-I ups strength — Sept. 129
Reducing loom stops with central weaving — June 131
Roll prevents creases at loom — Sept. 138
Seat belts woven at 250 ppm. — July 91
Tape weaving versatility with narrow-fabric loom — Apr. 144
Truck cuts two men from lifting job — Apr. 135
Weaving narrow fabrics at 2,000 picks per minute — Mar. 48

Man-made fiber winding
Automatic winder — July 100
Bulk put back in package-dyed orlon with simple assembly — Aug. 52
Carpet mill expansion – good way to spend $1½-million — Jan. 98
Cost trimmed 58% — June 47
Filling handling today: what's new, what it does, how it boosts mill profits – report — Oct. 52
Firth Carpet's Laurens, S.C. plant – managing for better handling and better production — Mar. 58
Hungarians reveal new yarn-winding machine — Nov. 37
Skein to cone: no rewinding — Mar. 138
Tensioning improves cone quality — Jan. 103
Tufted-carpet mill – building and starting a new mill — Apr. 82
Winder with lathe-type bobbin holders — Feb. 131

Materials handling
Air clutch — Sept. 142
Air-power tool doubles production — Oct. 135
Automatic handling of skeins — Nov. 152
Automatic material handling in Firth Carpet's Burnsville, N.C. spinning mill — Feb. 52
Automatic strapper eliminates overtime — Oct. 134
Beam holder offers 100% selection — Feb. 131
Bins use 100% warehouse space — Nov. 136
Building mills in eastern North Carolina – Quickly built, quicker to grow — July 44
Combining production operations saves labor — Apr. 135
Containers, collapsible, cut shipping costs — Jan. 104
Conveyor allows one man to replace two for handling — Apr. 134
Conveyor cuts packaging time — May 112
Doff box cuts handling time — Jan. 102
Easy-to-get-at rolls speed processing — Dec. 123
Filling handling today: what's new, what it does, how it boosts mill profits – report — Oct. 52
"Flip-top" truck speeds in-plant handling — Nov. 152
Hoist saves $2,500 annually — Mar. 124
Inspecting by assembly line — Jan. 102
Lap conveyor solves storage problems — Apr. 134
Lap handling method saves $10,000 — Feb. 119
Lap train cuts handling — Apr. 136
Lifting device cuts yarn handling costs 50% — May 118
Modernization cuts S-C-T's finishing costs — May 86
Old sliver cans cut handling 10% — Mar. 124
Pushbutton yarn handling — Nov. 42
Rewarping time cut in half — Sept. 118
Roll wrapper — Sept. 162
Rolls for storing cut handling costs — Oct. 135
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. — June 60
Shuttleless looms — July 30
Stapler, electric, speeds work 50% — May 120
Textile guider made from aluminum — Sept. 138
Track for overhead service — Sept. 140
Trimming high yarn costs — Sept. 42
Truck cuts two men from lifting job — Apr. 135
Truck, electric, speeds yarn hauling — Jan. 104
Trucks halve fabric-handling costs — Aug. 106
Trucks halve labor costs — July 82
Tube stripper triples output — Apr. 135
Tufted-carpet mill – building and starting a new mill — Apr. 82
Turbo can — Sept. 144
2-part success story – Pt 1: Better machines, better methods Pt 2: Can't-miss production control — Apr. 62
Warehousing costs cut 40% — Feb. 119
Waste heat from dyehouse heats storeroom — June 114
Weaveroom relocated down in the basement — Apr. 78
Weft straightener — Sept. 154
Wrapping tubed fabric new, easy way, boosts production 300% — Feb. 116

N

Narrow Fabrics
Narrow-fabric loom — July 106
Newest way to count picks — Sept. 47
Seat belts woven at 250 ppm. — July 91
Tape weaving versatility with narrow-fabric loom — Apr. 144
Weaving narrow fabrics at 2,000 picks per minute — Mar. 48

Nonwoven fabrics
Binders hidden in new nonwoven fabric — Mar. 73
Bonded fabric, Fiberloc — Apr. 140
Ethylose, modified cellulose, has finish applications — June 74
Fibers for nonwoven — Nov. 141
Hungarian method binds nonwovens — May 67
Japanese fabric – Bondene — Apr. 139
Loom lubrication at 2,000 ppm. — Jan. 103
Nonwoven binders — Jan. 71
Phenolic resins make cheaper batts — Aug. 107
Washable nonwovens — July 87

P

Packaging
Air-power tool doubles production — Oct. 135
Automatic strapper eliminates overtime — Oct. 134
Bale-tie machine saves $2,000 — Oct. 136
"Buggy" speeds cone packing 50% — Dec. 124
Conveyor cuts packaging time — May 112
Film cuts packaging costs 70% — Dec. 123
One-pair hosiery-packaging machine — Mar. 123
Printing machine for hosiery labels cuts labor 66⅔% — May 120
Stapler, electric, speeds work 50% — May 120
Strapping costs cut — July 82
Strapping cuts shipping damage 50% — Dec. 123
Tie-straightener saves $41,000 — Aug. 108
Woven narrow fabric packaging — Mar. 48

Power generation & transmission – see also Electrical equipment
Consolidation pays off big for Phoenix Dye Works — June 88
Electric power in textiles: 1961 – report — Jan. 32
How to make a fast comeback – Mary-Leila Cotton Mills, Inc. — Feb. 107
Hydraulic drive on dyebacks cuts time in half — Feb. 118
Juliette Milling – how this small mill stays competitive — Dec. 60
Package boiler saves $14,000 — Dec. 122
Runs on 450-rpm. input — Jan. 114
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. — June 60
Shuttleless looms — July 30
Static converters: more coming — Dec. 64
Ultrasonic "grinding" speeds dye diffusion — June 75
Water heater provides continuous hot water at no cost — June 113

Production control
Building mills in eastern North Carolina – Quickly built, quicker to grow — July 44
Carter Bros., Inc. – imagineering a brand-new company image — Sept. 48
Controlling 375 orders – all at once — Feb. 58
Data processing today: problems, practices and payoff – report — Mar. 42
First Washington's turn...and now it's your turn (Ed) — June 39
Grantville story – integration and modernization Pt 1 Getting set for top efficiency, top yarn quality — Aug. 54
Pt 2 Tops in raschel knitting — Aug. 60
Pt 3 Controlling cost and quality — Aug. 62
Pt 4 The best in plant service — Aug. 63
Knitting mill production control is a sure-fire profits formula — June 57
Record keeping cut 25% with ticket — June 114
Schlegel Co. Carolina, Inc. – newest mill in the U.S.A. — June 60
Tensile tester — Aug. 133
Trimming high yarn costs — Sept. 42
2-part success story – Pt 1: Better machines, better methods Pt 2: Can't-miss production control — Apr. 62

Tex system conversion table — Mar. 51
Twisting and winding modernization cuts costs, ups quality — July 35

INDEX TO COMPANIES AND MILLS

A

AMERICAN CARPET MILLS – Building and starting a new tufted-carpet mill — Apr. 82
AMERICAN CYANAMID CO. – Vat dyeing today O.W. Clark Pt 1 Mar. 78, Pt 2 Apr. 114, Pt 3 June 80, Pt 4 July 70, Pt 5 Aug. 84, Pt 6 Sept. 80, Pt 7 Oct. 96, Pt 8 Nov. 94, Pt 9 — Dec. 84
AMERICAN THREAD CO. – Data processing today – report — Mar. 42
AMEROTRON CORP. – Data processing today – report — Mar. 42
ANDERSON, CLAYTON & CO. – Short cut to better blending for cotton Lewis & Mayne Jr. — Aug. 70
ARGONNE WORSTED CO. – Better worsted yarn A.J. Gagnon Jr. — Nov. 61
Controlling 375 orders – all at once A.J. Gagnon Jr. — Feb. 58
AVONDALE MILLS, INC. – Data processing today – report — Mar. 42

B

BLAIR MILLS – Small towel mill boosts production with new machinery — May 61
BORG FABRIC DIV., AMPHENOL-BORG ELECTRONICS CORP. – Modernizing by creating a new product — May 57
BRIDGEPORT FABRICS, INC. – Weaving narrow fabrics at 2,000 picks per minute — Mar. 48
BRITTANY DYEING & PRINTING CO. – Wash- and wear for all-silk fabrics — Oct. 102
BRUCK MILLS LTD. – Data processing today – report — Mar. 42

C

CANTON COTTON MILLS – New power system cures headaches — Jan. 41
CAROLINA MILLS – The facts about shuttleless looms R.B. Pressley — July 30
CHATHAM MFG. CO. – Data processing today – report — Mar. 42
CHICOPEE MFG. CO. – Data processing today – report — Mar. 42
CHOPAK MILLS, INC. – A new high in knitting speed R.K. Worth — Feb. 68
CLOVERDALE DYE WORKS – Dye-plant modernization pays off three ways — Apr. 120
COATS & CLARK – Data processing today – report — Mar. 42
COURTAULDS – Prestwick – a new cotton finish from an old reactant — Dec. 109

D

DAN RIVER MILLS – Data processing today – report — Mar. 42
DEERING MILLIKEN RESEARCH CORP. – Agilon edge-crimped yarn – latest word in texturing — Jan. 54
DOMINION TEXTILE CO. LTD. – Data processing today – report — Mar. 42
DRAYTON MILLS – No-hands doffing – U.S. style — Mar. 55
DU PONT DE NEMOURS, E.I. & CO. – This simple assembly puts bulk back in package-dyed orlon H.T. Pratt — Aug. 52

F

FACTORY INSURANCE ASSOCIATION – How to ban fires in your mill Swaffield Cowan — Jan. 46
FAIR-TEX MILLS, INC. – Moving fast on new styles — Mar. 63
FIRTH CARPET CO. – Burnsville, N.C. spinning mill – material handling goes automatic — Feb. 52
Laurens, S.C. plant – managing for better handling and better production — Mar. 58
FLAGG-UTICA CORP. – Grantville story – integration and modernization
Pt 1 Getting set for top efficiency, top yarn quality — Aug. 54
Pt 2 Tops in raschel knitting — Aug. 60
Pt 3 Controlling cost and quality — Aug. 62
Pt 4 The best in plant services — Aug. 63
FRANKOWEAVE, INC. – Newest way to count picks — Sept. 47
FRUIT OF THE LOOM, INC. PONTIAC DIV. – Reactive dye batches mixed continuously — June 84

G

GRANITEVILLE (S.C.) CO. – Corduroy cutters break bottleneck — Mar. 90

H

HANES, P.H. KNITTING CO. – Pushbutton yarn handling — Nov. 42
HARRISS & COVINGTON HOSIERY MILLS, INC. – 2-part success story – Pt 1: Better machines, better methods Pt 2: Can't-miss production control — Apr. 62
HELLWIG DYEING CORP. – Finishing top-quality textured crepes — Jan. 86

J

JED PROCESSING CORP. – Dyeing yarn where they said not to – Woonsocket, R.I. plant — Feb. 84
JOANNA COTTON MILLS CO. – Old mill gets a facelifting — May 64
JONATHAN LOGAN INC. BUTTE KNITTING MILL DIVISION – Butte Story Pt 1 Knitting quality goods Nov. 55 Pt 2 Package dyer's dream — Nov. 86
JULIETTE MILLING CO. – How this small mill stays competitive — Dec. 60

K

KENYON PIECE DYE WORKS, INC. – Modernizing step by step — May 90
KERR BLEACHING & FINISHING WORKS – Handling cuts cost 50% – fast warehousing plus bulk storage — Apr. 70

L

LONG SHOALS COTTON MILLS, INC. – Lincolnton, N.C. plant – from this big fire, a new start — Feb. 61

M

MARY-LEILA COTTON MILLS, INC. – How to make a fast comeback — Feb. 107
MASLAND DURALEATHER CO. – Laminating vinyl to fabric — Sept. 89
MAYFAIR MILLS – Air conditioning improves quality, efficiency — Apr. 75
MELVILLE TEXTILE PRINT WORKS, INC. – Terry towels, hottest thing in printing — Feb. 82
MERINO WORSTED SPINNING MILLS LTD. – Fresh look at quality control A. Tavaler — Aug. 64

N

NATIONAL SPINNING CO. – Quickly built, quicker to grow ... July 44
NORTH CAROLINA STATE COLLEGE – Tex system conversion table B.L. Whittier ... Mar. 51

P

PEPPERELL MFG. CO. – Data processing today – report ... Mar. 42
Prestwick – a new cotton finish from an old reactant ... Dec. 109
PHOENIX DYE WORKS – Consolidation pays off big ... June 88
PICKENS MILL – Weaveroom relocated down in the basement ... Apr. 78

Q

QUAKER MEADOWS MILLS, INC. – Flatless carding – will it pay off in your mill? ... Dec. 66

R

REEVES BROS. INC. – Making canvas last longer ... Aug. 94
